10 Foster street on Saturday afternoon day's waste, sour fermentations and poisst 3 o'clock. See ad. on page 9. D. A. sonous toxins before it is absorbed into Perry, auctioneer. the blood. Just as coal, when it burns, leaves behind a certain amount of incom-tenor soloist, vocal teacher and coach, leave in the alimentary organs a certain or Hotel Barre.—adv.

amount of indigestible material, which Mr. and Mrs. Henry Plouff of South if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.

Mr. and Mrs. Henry Plottle of South Main street left the city this morning for Claremont, N. H., where they expect to make a stay of several days.

Charles T. Southgate, ticket agent at the body.

the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning, upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waster was a part of his time in quest of deer.

Mrs. James Davison of Hill street left this morning for Morrisville, where she harmless means of washing the waster. harmless means of washing the waste will join her husband for a visit through material and toxins from the stomach, liver, kidneys and bowels, thus cleansing. Morrisville earlier in the week to stay sweetening and purifying the entire ali-mentary tract, before putting more food into the stomach.

Men and women with sallow skins, liver spots, pimples or pallid complex-ion, also those who wake up with a coated tongue, bad taste, nasty breath, bilious spells, acid stomach or constipation, should begin this phosphated hot water drinking and are assured of very pronounced results in one or two weeks.

A quarter transition, and are assured of very pronounced results in one or two weeks.

George H. St.

A quarter pound of limestone phosphate costs very little at the drug store, but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do .- Adv.

O. this should not be allowed to take plane.

Here is another Overland model. A brand-new car at a brand-new price. Many people prefer a car that is smaller, lighter and more economical to run, but with the advantages of the larger and higher-priced cars.

Model 75 is a comfortable family car with virtually all the advantages of the very large cars, at a price which is well within your reach.

The price is only \$615! It has a powerful motor; electric starting and lighting system; high-tension magnet ignition; 104-inch wheelbase; cantilever springs; four-inch tires; demountable rims; streamline body design.

This season our factory capacity has been increased to 600 cars a day. This, in itself, explains our ability to give so much

car for so little money. This newest Overland is a beauty.

The body is the latest full streamline design with a one-piece cowl. It is handsomely finished in solid black with bright

neckel and polished aluminum fittings. Five adults can ride comfortably. While the car is roomy, it is light in weight, 2,160

pounds. It has demountable rims, with one extra.

The tires are four-inch all around, because we believe in the advantage of large tires.

They insure greater mileage and comfort than can be obtained from the smaller size used on other cars of similar specifications. The motor is four-cylinder, long-stroke en-bloc type,

having a 31/4-inch bore and 5-inch stroke. Horsepower is 20-25. It is of the most modern design. It has high-tension magneto ignition. This is the kind used on the most expensive cars.

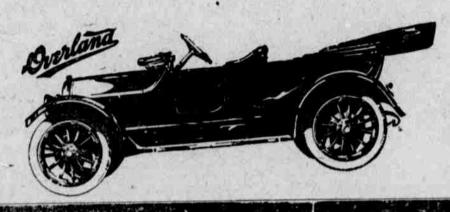

The electric starting and lighting system is one of the most efficient on the market. It is of the two-unit type. The large elective headlights have dimmers.

Model 75-f. o. b. Toledo

Roadster \$595

With Electric Starter and Electric Lights

Four-Inch Tires

This car is very easy to handle. It responds quickly. Anyone in the family can drive it.

The electric switches are conveniently located on the

steering column. This is the same arrangement used on the highest priced cars.

on the highest priced cars.

It has the easy working Overland clutch, which any woman can operate. The pedals are adjustable for reach. The steering wheel is large and turns easily.

The brakes are large and powerful.

The rear springs are the famous cantilever type. These are probably the easiest riding and most shockabsorbing springs ever designed. With these springs riding comfort is insured.

The seats are roomy and comfortable, for the soft cushions are built over deep coiled springs.

It has a mohair one-man top.

It has a mohair one-man top. In short, there is everything that makes this car up-to-date and comparable with many cars costs considerably more money.
You will be delighted when you see it. And when

you ride in it you'll know instantly that this is your
